

LINDA FRENCH

Chief Privacy Officer, Alberta Health Services

Linda is a 20+ year lawyer who has held senior leadership roles in Legal, Human Resources, and Internal Communications. She also facilitated leadership training in performance coaching and counselling across North America as an internal leader peer, and was the lead of a significant corporate transformation project.

Under her leadership, AHS' Privacy function is undergoing some transformation of its own. The function has restructured to having a business partnership focus, and to work collaboratively with other teams to approach the issues from a proactive and patient focused perspective.

Linda's team knows that in a fast paced world of necessary information sharing we all need to be empowered to make professional judgements about privacy related matters throughout our work days. Linda's team is working to improve confidence on the frontlines when handling these privacy matters.
